UniHive™

THE CONNECTED CAMPUS MARKETPLACE & DISPATCH NETWORK

DOCUMENT REF: UNIHIVE-PROP-2026-V2
CLASSIFICATION: Institutional Proposal
DATE: September 2026

PROJECT TITLE:	Establishment of a Secured, Multi-Tenant Campus Commerce & Ground-Floor Porter Lodge Logistics Platform
TARGET INSTITUTION:	The University Management (Through the Office of the Vice-Chancellor / Dean, Student Affairs / Directorate of Entrepreneurship Studies)
FLAGSHIP LAUNCH CAMPUS:	**Ajayi Crowther University (ACU), Oyo**
EXPANSION PIPELINE:	Bowen University (Iwo), Babcock University, Afe Babalola University (ABUAD), Pan-Atlantic University (PAU)
LEAD PROPONENTS:	UniHive Project Steering Group & Student Entrepreneurship Initiative
INSTITUTIONAL COST:	**₦0.00 (Zero Capital Expenditure for University Management)**

1. EXECUTIVE SUMMARY

Across Nigerian private universities, thousands of ambitious undergraduate students run vibrant micro-enterprises—providing essential student needs such as textbooks, study guides, tech peripherals, quality footwear, thrift fashion, packaged snacks, and grooming products.

However, **the entire commercial lifeblood of private residential campuses currently relies on unregulated, chaotic WhatsApp statuses and broadcast groups**. This informal mode of trade produces severe institutional liabilities: continuous financial scams that burden Student Affairs, unauthorized student loitering around residential halls, physical security vulnerabilities at hostel gates, and lost economic opportunities for genuine student merchants.

This document presents **UniHive™**—an institutional, multi-tenant digital marketplace and verified courier dispatch ecosystem engineered specifically for the regulatory and physical realities of private residential universities.

100%	**0-Room**	**4-Digit**	**₦250**
ESCROW PROTECTED FUNDS	ENTRY SECURITY RULE	BCRYPT HANDSHAKE PIN	RUNNER WORK-STUDY TRIP

UniHive integrates a **Dual-Settlement Escrow Vault** (backed by Paystack subaccounts), a strict **Zero-Room-Entry Rule** (terminating all handovers at hostel ground-floor porter lodges), an **RFC 6238 TOTP Two-Factor Authenticated Admin Command Center** for university proctors, and a vetted **Student Courier Work-Study Fleet**.

We respectfully request the approval of University Management to pilot this initiative at **Ajayi Crowther University (ACU)** as our flagship campus across designated male and female halls of residence.

2. PROBLEM STATEMENT: RISKS OF INFORMAL WHATSAPP COMMERCE

The current reliance on informal WhatsApp statuses creates severe security, administrative, and consumer protection risks within the university perimeter:

Current Reality (WhatsApp)	Institutional Risk to the University	Impact on Students & Security
Unprotected Upfront Transfers Buyers transfer cash to vendor personal accounts before receiving items.	Rampant financial scams ("*vendor collected money and blocked buyer*"). The Office of Student Affairs and Hall Wardens spend countless hours mediating petty theft disputes.	Erosion of peer trust; students lose semester pocket money to untraceable fake student vendors.
Unregulated Movement & Hostel Drop-offs Informal meetups at hostel gates, corridors, or unlit corners after hours.	Breach of university gender-boundary rules and hostel security protocols. Hall porters face friction monitoring unauthorized visitors.	Students loiter outside hostel perimeters, creating personal safety risks and violating campus curfew.
Zero Commercial Visibility Goods vanish after 24 hours on WhatsApp statuses. Buyers spam groups asking "*Who sells X?*"	Student businesses struggle to scale beyond immediate friends, stifling the University's entrepreneurship goals.	Frustrating student buying experience; students forced to seek off-campus alternatives for simple necessities.
Lack of Product Moderation No central catalog oversight.	Circulation of unapproved, sub-standard, or policy-violating products (e.g., prohibited apparel, vapes).	Reputational exposure for the university and lack of quality assurance for student consumers.

3. THE UNIHIVE™ SOLUTION: ARCHITECTURAL PILLARS

UniHive™ replaces unregulated campus trade with a centralized, transparent, and institutionally governed digital platform built upon four core pillars:

🛡️ Pillar 1: The Zero-Trust Dual-Settlement Escrow Vault

Buyers pay into the UniHive Escrow Vault at checkout. **The vendor is NEVER paid upfront.** Funds are locked until the buyer physically inspects the item at the hostel ground-floor porter lodge and discloses their confidential 4-digit PIN.

🚪 Pillar 2: The Mandatory Zero-Room-Entry Rule

To respect university moral guidelines, hall segregation, and student privacy, **no delivery runner is permitted into hostel rooms or corridors**. All handovers strictly terminate at the ground-floor Porter's Reception Desk under security oversight.

🔑 Pillar 3: Single Identity with 4-Role Switcher & Admin 2FA

A unified account gateway allows students to switch between **Buyer**, **Vendor**, and **Courier**. Campus proctors and Student Affairs personnel access the **Admin Command Center** secured by RFC 6238 TOTP Two-Factor Authentication (Google Authenticator).

💼 Pillar 4: Structured Work-Study Student Dispatch Network

Deliveries are performed exclusively by verified, academically sound student runners earning **₦250 per completed drop-off**, establishing an honorable intra-campus micro-income network.

4. OMNICHANNEL UI/UX DESIGN SYSTEM

UniHive is fully designed and prototyped with responsive fidelity across two distinct visual themes tailored for their respective user environments:

- **Clean Campus Light Mode (Students & Merchants):** Crisp white backgrounds (`#FFFFFF`), deep institutional navy (`#0F2B5C`, `#1E3A8A`), soft blue accents (`#EFF6FF`), and energetic amber gold (`#F59E0B`). Designed for high readability on smartphones across campus and laptops in dorm rooms.
- **Operations Dark Mode (Campus Administration):** Deep slate surfaces (`#0B1120`, `#0F172A`) with high-contrast emerald and crimson status indicators. Designed for focused, 24/7 dispatch monitoring and dispute arbitration.

UniHive™ Desktop Web Application • Full Responsive Suite

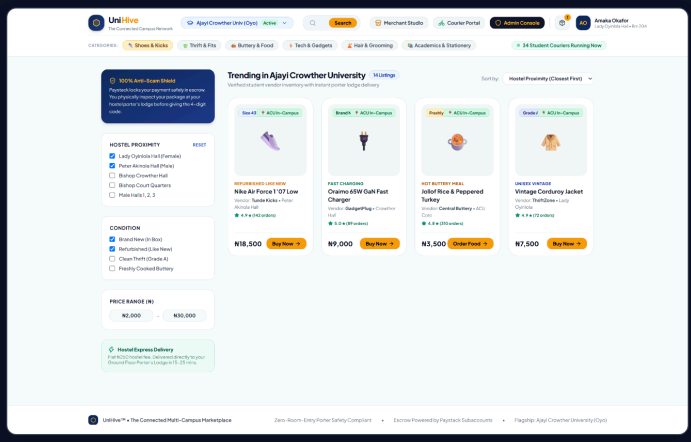

Uni Hive Desktop Web Experience & Command Center

Optimized for student laptop browsing in hostel rooms, vendor catalog management, and campus administration control.

5. GROUND-FLOOR PORTER LODGE PROTOCOL & ZERO-ROOM-ENTRY

The safety of residential hostels is paramount. UniHive embeds the university's physical boundary regulations directly into its dispatch algorithms:

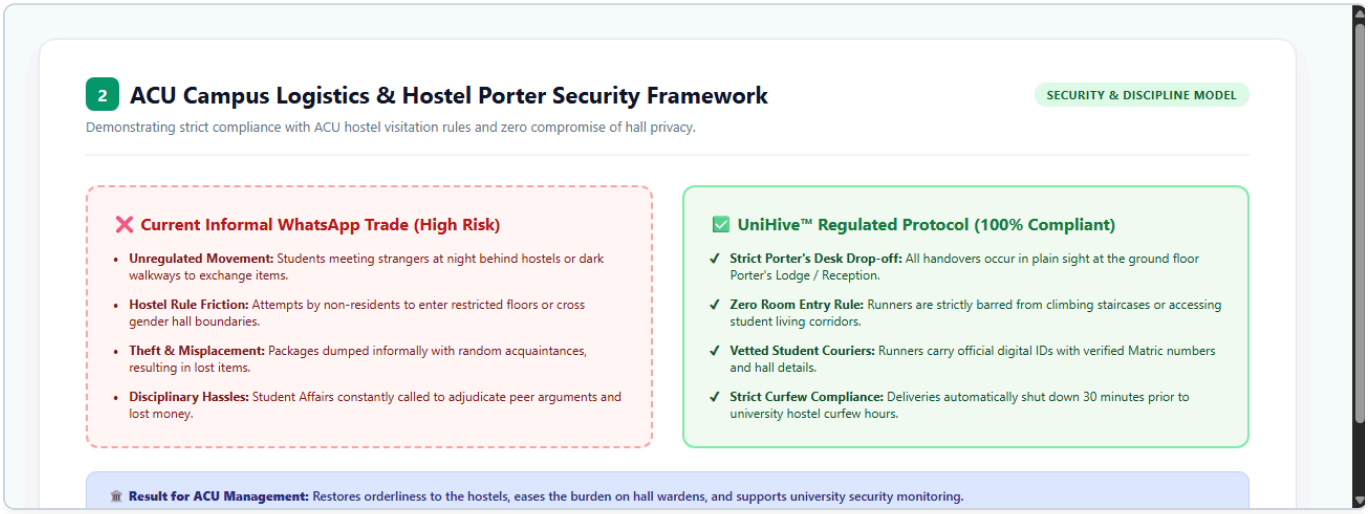

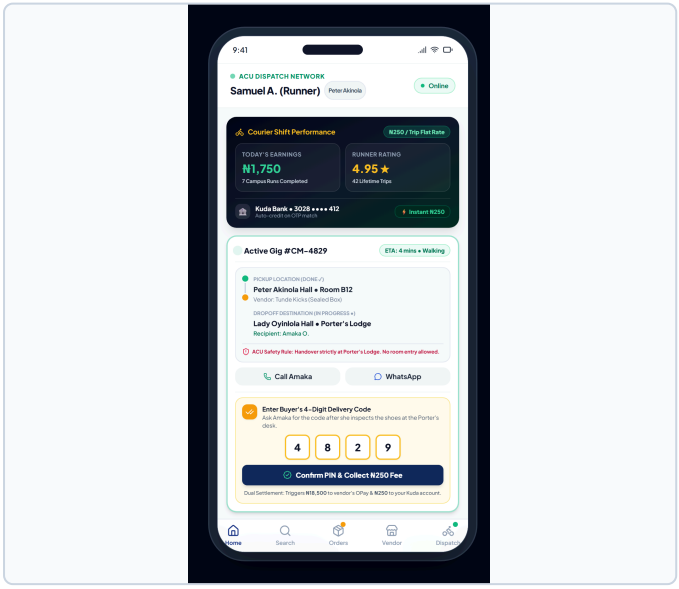

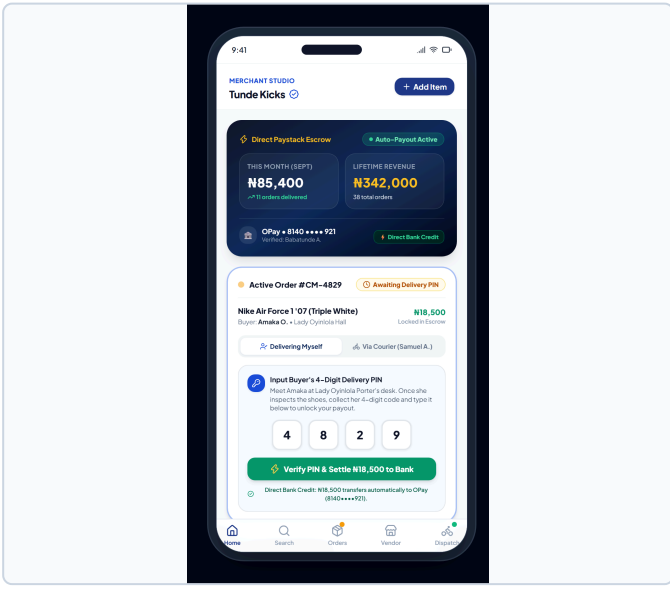

Figure 4: Ground-Floor Reception & Porter Lodge Inspection Workflow

Dedicated Logistics & Handshake Terminals:

Screen 7: Courier Dispatch & Porter Drop-off Portal

Screen 6: Ground-Floor Porter Handshake Terminal

Step-by-Step Handover Contract:

1. **Order Dispatch:** Once payment is locked in escrow, an approved student courier claims the package and proceeds to the vendor.
2. **Transit to Destination Hall:** The courier arrives at the buyer's residential hall (e.g., *Lady Oyinlola Hall* or *Peter Akinola Hall*). **The courier does not enter the gate or stairs**.
3. **Porter Lodge Arrival:** The courier checks in at the **Ground-Floor Porter's Reception Desk**. The buyer is notified via instant SMS/WhatsApp to come down to the reception.
4. **Physical Inspection:** In the presence of the porter and courier, the buyer unboxes and physically inspects the item (verifying size, condition, functionality, and fit).

5. **Handshake Verification:**
   - **Item Approved:** Buyer discloses their confidential 4-digit PIN. The runner types it into the UniHive terminal. System verifies the bcrypt hash and atomically triggers Paystack split payouts:
     - **Item Subtotal (e.g., ₦18,500) ➔** Transferred instantly to Vendor's Bank / OPay account.
     - **Courier Fee (₦250) ➔** Transferred instantly to Student Courier's Kuda Bank account.
     - **Platform Fee (₦100) ➔** Retained as UniHive maintenance revenue.
   - **Item Rejected / Disputed:** The buyer withholds the PIN and clicks "Raise Dispute". Escrow remains safely frozen. The runner returns the item to the vendor, and the Admin Command Center reviews for an instant 1-click refund.

> ⚠️ **Anti-Brute-Force 3-Strike Lockout Protection**
> If any courier or unauthorized person attempts to guess the 4-digit PIN, the system permanently locks the transaction after **3 failed attempts**, freezes the escrow funds, and automatically dispatches an alert to the university proctor desk.

6. PRODUCT GOVERNANCE & INSTITUTIONAL MORAL POLICY

UniHive strictly upholds university moral standards and code of conduct. The platform enforces an automated keyword blacklist, automated image moderation, and active merchant vetting:

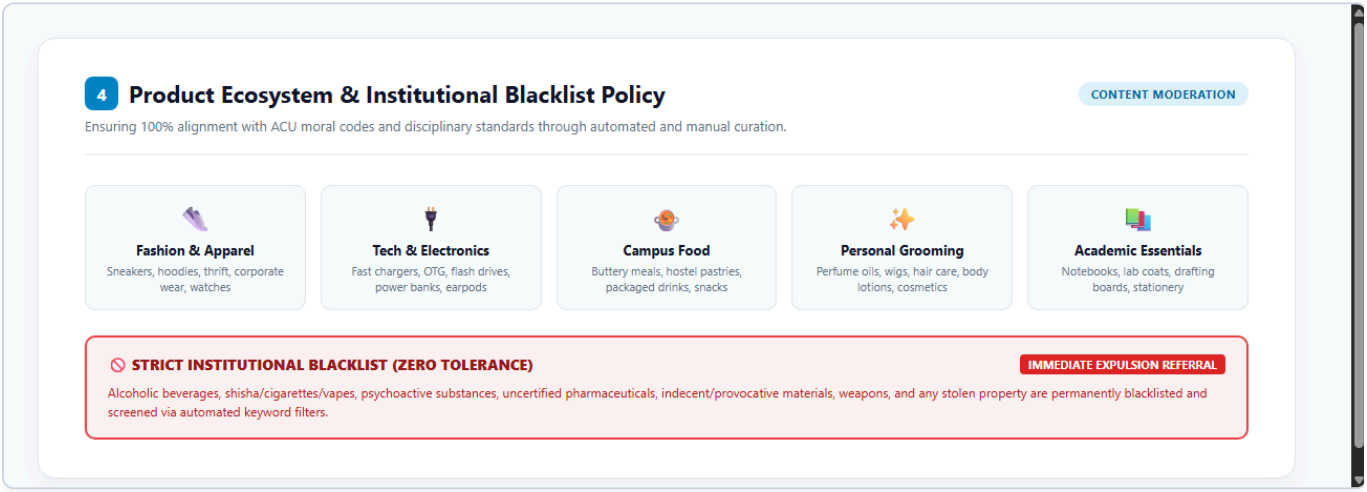

Figure 5: Permitted Student Merchandise vs. Strictly Prohibited Institutional Blacklist

✅ Permitted Student Merchandise	🚫 Strictly Prohibited Blacklist (Instant SDC Referral)
Footwear & Apparel: Formal corporate wear, matriculation blazers, sneakers, slides, university-compliant thrift wear.	**Alcohol & Tobacco:** Cigarettes, shisha, e-cigarettes, vapes, spirits, beers, alcoholic mixtures.
Tech & Electronics: Laptops, flash drives, scientific calculators, extension boards, phone chargers, power banks.	**Illicit Substances & Unapproved Medicines:** Prescription narcotics, stimulants, unregulated sexual supplements.
Academics & Stationery: Textbooks, departmental manuals, drawing sets, lab coats, past question compilations.	**Indecent & Provocative Wear:** Clothing violating university dress codes (sleeveless, transparent, excessively short).
Hostel Provisions & Packaged Foods: Bread, water cartons, cereals, noodles, hot grilled pastries, snacks.	**Weapons & Dangerous Implements:** Knives, stun guns, fireworks, unauthorized cooking gas cylinders, immersion heaters.

7. FINANCIAL INTEGRITY & ZERO COST TO THE UNIVERSITY

UniHive imposes **zero financial liability or capital expenditure** on Ajayi Crowther University:

- **Fully Self-Funded:** Development, cloud server hosting, Paystack payment gateway fees, and database operations are 100% financed by UniHive.
- **Transparent Escrow Math:**

```
Total Checkout = Item Subtotal (₦18,500) + UniHive Tech Fee (₦100) + Courier Delivery (₦250) = ₦18,850
```

- **Instant Bank Settled Micro-Income:** Student couriers receive their ₦250 delivery earnings directly to their bank accounts upon completion—no manual payout delays.

8. ADMINISTRATIVE COMMAND CENTER & PROCTOR CONTROLS

UniHive equips the Dean of Student Affairs, Hall Wardens, and University Security with an exclusive, dark-mode **Operations Command Center**:

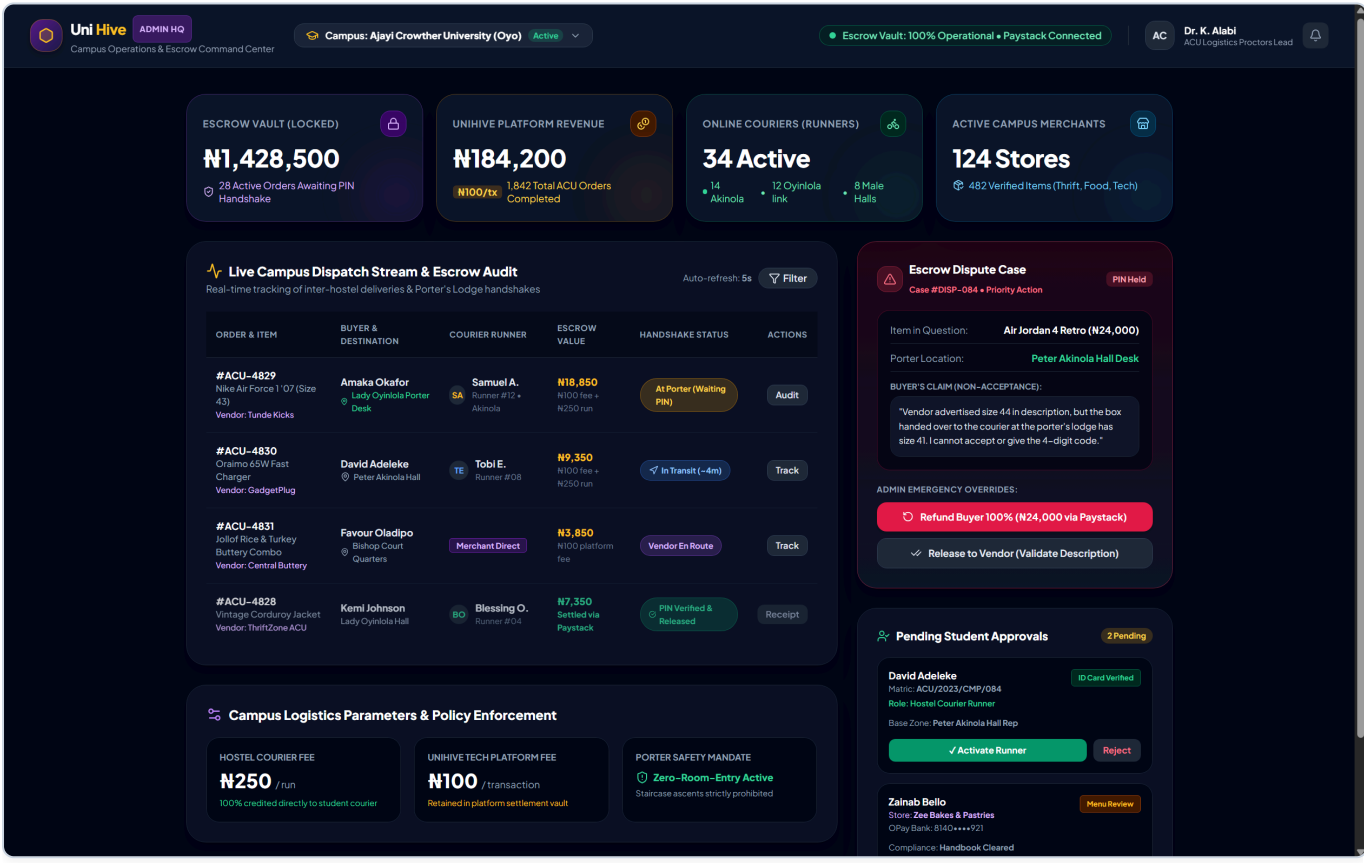

Figure 6: UniHive™ Admin Operations Command Center (Real-Time Dispatch Telemetry & Dispute Overrides)

Key Administrative Capabilities:

- **Live Campus Telemetry:** Real-time table of all active package transits, hall destinations, and porter desk handshakes across ACU.
- **One-Click Dispute Arbitration:** If an item is misrepresented, campus administrators have override authority to issue a 100% refund to the student buyer or release funds to the vendor.
- **Student Courier & Merchant Vetting Queue:** Administrative staff verify student matriculation numbers, student ID cards, and hall allocations before authorizing runner or merchant accounts.
- **Audit Logs:** Comprehensive immutable ledger of all financial settlements, timestamps, and porter desk handshakes.

9. FLAGSHIP PILOT IMPLEMENTATION TIMELINE (ACU)

We propose a controlled, phased 8-week pilot launch at Ajayi Crowther University:

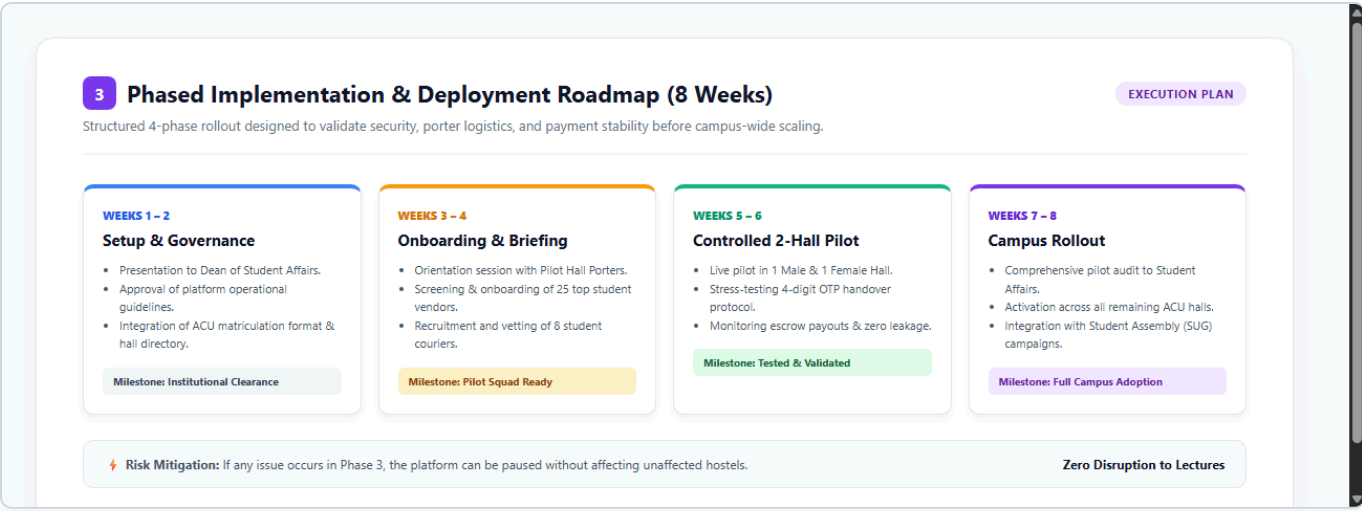

Figure 7: 8-Week Phased Rollout Roadmap for Ajayi Crowther University

Phase	Key Milestones & Actions	Stakeholder Involvement
Weeks 1–2 Governance & Setup	Formal presentation to Student Affairs; integration of ACU residential hall directories (Oyinlola, Akinola, Crowther).	Dean of Student Affairs, Directorate of Entrepreneurship, Campus IT.
Weeks 3–4 Porter Orientation & Vetting	Briefing sessions for ground-floor hall porters; vetting of initial cohort of 30 student merchants and 10 student couriers.	Hall Wardens, Chief Security Officer, Head Porters.
Weeks 5–6 Controlled 2-Hall Pilot	Controlled pilot between 1 Female Hall (*Lady Oyinlola Hall*) and 1 Male Hall (*Peter Akinola Hall*). Stress-testing PIN handshakes.	Pilot Hall Porters, Vetted Runners, Pilot Student Users.
Weeks 7–8 Full Campus Rollout	Review of pilot metrics with Student Affairs; expansion across all ACU halls of residence.	University Management, Student Union Government (SUG).

10. PRAYER / ACTIONS RESPECTFULLY REQUESTED

The Project Steering Team respectfully prays that the Management of **Ajayi Crowther University** grants:

1. **Approval in Principle:** Formal endorsement to pilot UniHive™ as the official secured student commerce and courier dispatch platform for ACU.
2. **Porter Lodge Reception Clearance:** Authorization for hall porters at designated pilot halls to permit ground-floor package inspections and handovers.
3. **Advisory Oversight:** Designation of a liaison officer from the Directorate of Student Affairs or Entrepreneurship Studies to maintain continuous regulatory alignment.
